EXPERIENCE

HeyAudio— *Co-Founder*

Aug 2023 - Present

- ❖ Developed cross-platform mobile apps (Flutter/Dart)
- ❖ Built and deployed low-latency Python/FastAPI backend for real-time WebRTC audio processing using LiveKit
- ❖ Trained, fine-tuned, and served LLMs and custom models to power domain-specific voice assistant capabilities

ArribaTec— *Senior Core Engineer*

Jan 2022 - Aug 2023

- ❖ Owned DevOps infrastructure and security on Microsoft Azure, implementing best practices for scalable cloud architecture, firewalling, VPN connectivity, access control, reliability, and operational efficiency
- ❖ Improved frontend architecture and developer workflows by introducing best practices, Redux state management, mock servers, and automated testing to increase maintainability and speed up development cycles
- ❖ Ship maintainable, reliable and performant full-stack features in React/React Native, Node.js and MongoDB
- ❖ Developed and maintained a Next.js admin dashboard for managing and monitoring self-service kiosks

Paycertify — *Senior Fullstack Engineer*

August 2018 - Jan 2022

MACHINE LEARNING

- LLMs, CNN, RNN and Transformer architectures
- Agentic workflows: CrewAI, Agno and Langchain
- RAG: sparse and dense retrieval
- Prompt engineering (llm-as judge, CoT, ReAct, Reflexion)
- Harnesses: Hermes, PI, Claude Code

GENERAL SKILLS

- Data structures and algorithms
- Computer networks
- Windows/Linux/macOS

FRONTEND SKILLS

- HTML, CSS, Javascript
- React, Angular, Ember

BACKEND SKILLS

- Node.js, Go, Python
- Postgres, MySQL, SQLite, MongoDB, Redis
- Nginx, load balancing,

- ❖ Wrote clean, scalable and maintainable RESTful APIs, real-time sockets using Node.js and PostgreSQL
- ❖ Wrote clean, performant, secure and maintainable frontend code in a test-driven development culture

Techdata – Senior Frontend Engineer

August 2014 – August 2018

- ❖ Lead for the company's design system
- ❖ Lead for organization's landing page
- ❖ Built and scaled high-traffic e-commerce applications using Angular and .NET, with a focus on performance, reliability, and maintainability

Positive Impact Magazine– Web Developer

August 2014 – Feb 2015

- ❖ Designed and maintained the company's website using PHP, MySQL, HTML, CSS and Javascript
- ❖ Implemented SEO best practices
- ❖ Created a hybrid app using Cordova/Phonegap

reverse proxying, firewalling, vpn

– Sharding, replication, partitioning, message queues, Publish/Sub architecture

– HTTP, GRPC, TCP/Websockets, UDP, Webhooks, SSL, TLS, SSE, WebRTC (LiveKit)

CLOUD SKILLS

– AWS, Google Cloud, Digital Ocean, Firebase, Heroku, Azure

SECURITY

– XSS, CSRF, Dom Injection, SQL Injection, DDoS

– Firewalls and VPNs

TESTING

– Unit testing (Mocha, Jest, Sinon, Qunit)

– E2E testing (Selenium, Nightwatch)
